

TB Testing Sites

What do I need?

Results of a negative TB test or chest x-ray are required from all students prior to starting clinical, preferably on the first day of class. (Some facilities will require students to provide results of a 2 step TB test. Please refer to your orientation letter to determine if you need a one or two step TB test.)

If you have a primary care physician you can make a Nurse appointment there for your TB test. Other options are available on this list.

Call to make an appointment as soon as possible as it takes several days to get your results.

What is a 2 Step TB?

A two-step TB requires the intradermal injection on two separate occasions. After you have completed the first round, you would then repeat the process approximately 1 week later.

**ConvenientMD locations do not require an appointment. They are open 7 days per week from 9 am – 9 pm and have offered to give students of LNA Health Careers a special discounted rate. Please refer to the back of this form for information on how to take advantage of the discount!*

MANCHESTER/BEDFORD

NH Health Department
1528 Elm St., Manchester
